**NO DRUGS — NO CHEMICALS**

**CORONA  
BEEF™**

**BIOLOGICALLY ORGANIC**

**Produced With No Antibiotics**

**No Added Hormones**

**No Agriculture Chemicals**

**5 Star Quality**

# Specially Bred For Consistent Quality and Tenderness

**CORONA BEEF™** animals are fed a special diet of totally bio organic feed grown from six different types of plants which are all raised with **NO POISONOUS AGRICULTURE CHEMICALS**. During the summer the cattle graze in the pastures. When the grass is gone, the calves come into the feedlot where they are fed oats, peas, corn, alfalfa, sorghum, balanced minerals, and silage.

Approximate Weights

ONE WHOLE BEEF—440 lbs = \$1870  
ONE HALF BEEF—220 lbs = \$935  
ONE FOURTH BEEF—110 lbs = \$468

**FAITH ACRES FEEDLOT** guarantees that these beef animals were fed chemical free feed grown without poisonous pesticides, herbicides, or chemical acid based fertilizer. These beef animals were not implanted with growth hormones and were not injected with any parasitic removal drugs.

## **NOTICE TO CONSUMER**

It takes approximately 15 months for a calf to get large enough to become a quality beef animal. To reserve your beef, you must order now to be assured delivery. Your down payment is only an approximate amount. The balance due may be a few dollars more or less depending on the animal's actual weight.
